

Flight In the Danger Zone: Non Towered Airport Operations

Operations at non-towered airports can be a high-risk mixing bowl of jets, turbo-props, single engine trainers, and light sport aircraft. Communications are optional. Learn what you can do to improve your safety and others in the pattern with you. Volunteer to participate in a traffic pattern scenario skit that gets everyone in the room involved. You may very well see yourself in many of the traffic conflicts that occur in the skit. This presentation has been performed in numerous locations with much success. Register Today; Seating is limited!

Directions: Please see map link. Transportation to the college can be arranged to all fly-in participants provided you first make requests through the contact person listed below at least three hours before the seminar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
